Project Initialization and Planning Phase

Date	27 June 2026
Team ID	xxxxxx
Project Title	Emotion Detection and Learning Support Engine
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposal report aims to transform loan approval using machine learning, boosting efficiency and accuracy. It tackles system inefficiencies, promising better operations, reduced risks, and happier customers. Key features include a machine learning-based credit model and real-time decision-making.

Project Overview	
Objective	Develop an AI system that detects student emotions and provides personalized learning support.
Scope	Supports emotion detection, personalized recommendations, progress t insights for online learning
Problem Statement	
Description	Online learning platforms cannot recognize students' emotions or adapt learning content accordingly.
Impact	Reduced engagement, lower motivation, and decreased learning effectiveness.
Proposed Solution	
Approach	Use AI, computer vision, and machine learning to detect emotions and recommend suitable learning content.
Key Features	• Real-time emotion detection. • Personalized learning recommendations. • Progress tracking dashboard. • Emotion analytics for teachers.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU/GPU specifications, number of cores	Intel Core i5/Ryzen 5 or higher
Memory	RAM specifications	8 GB
Storage	Disk space for data, models, and logs	1 TB SSD
Software		
Frameworks	Python frameworks	Flask, OpenCV, TensorFlow
Libraries	Additional libraries	NumPy, Pandas, Media Pipe, TensorFlow, scikit-learn
Development Environment	IDE	VS Code, Jupyter Notebook
Data		
Data	Source, size, format	FER-2013 or CK+ Dataset (CSV/Image format)
